

Anne Arundel County Public Schools
CATN and Severna Park HS
Important Internet Access Information
Software Availability – Computers, Host Schools

Using Personal Devices

Anne Arundel County Public Schools (AACPS) has filtered wifi access for users to access the internet on personal devices. If users have desktops they will need to have a wifi adapter to connect to the hotspot. No desktop equipment other than AACPS devices may be connected via a network cable.

Any websites that you know will need to be accessed on the hotspot must be sent to me in advance so that we can make sure they are vetted and whitelisted through our filter.

Using Available Software on Host School Computers

SkillsUSA IT-Related State Contests	Image Available on Host School Computers
